Dear friends,

It's me, Anand, who got job in Infosys few days back and mailed to group saying thanks to CHETANA and Surendra.

I received 259 mails as a whole saying 'Congrats' and each one asking me to tell them about my preparation and give guidance. thanks to evryone.

I do can understnd your enthuuu and anxiety to get a job. its not that I dont want to reply everyone. but imagine that I do not be able to reply to 259 mails. dont scold me for that that ima not helping nature.

thats the sole purpose why iam mailing to group abt test to clear your doubts.

One thing I say is 'Read Completely the mail from our group owner CHETANA sent few days back about infosys pattern'. there isnot any other guidance for me. i didnt followed any other books except those mentioned in that mail. i didnt read any previosu papers. after preparing those books thouroughly just casually i went to exam and attempted the test with absolute cool mind (just as CHETANA said in her mail). And I got through. if your analytic skills are good, notmuch prep is needed , as she (chetana) said clearly.

i told her to send that mail again for those who joined late in our group. read that mail at least this time.

about english test,there is nothing in english test. its very easy & basic.

few people mailed asked me abt interview. but there is no intervoiew for Infosys test. (alsd this point is mentioned in her mail.So I do wondering whether you all people are reading mails carefully.)

try to read each mail sent to group carefully

with my experience i can say dont get tensed unnecessarily. test is very much much easy. you will get through if you write with cool mind.

all the best your infosys test@@@@@@@@@

bye bye guys

@@@@@@@@@@@@@@@@@@@@

Anand
